

## German Exchange Programme

Learning about German culture, speaking in German and making new friends from Germany - this academic year an exciting online exchange programme started between DSB International and Ernst-Sigle-Gymnasium in Kornwestheim, which is located in the southwestern part of Germany.

The programme presents a unique opportunity for all the DSB students involved to get to know German peers, to learn about daily life in Germany and to put their German skills into practice. Students of all grades of secondary school at DSB participate in the programme in two groups and meet up online once per month with their German exchange partners. The students are working on projects together, which are published in digital books.

The aim of the projects is to enable the students to get to know each other better, to discuss various aspects of their daily lives with each other and to sensitize them to the similarities and differences between the German culture and the various cultural backgrounds of the students of DSB. Beyond that, the DSB students are able to put their German skills into practice, which will benefit and enhance their German language learning further.
